DETAILED ACTION

Information Disclosure Statement

1. Applicants' Information Disclosure Statement, filed 27 June 2005, has been received, entered into the record, and considered. See attached form PTO-1449.

Claim Rejections - 35 USC § 101

2. Claims 1-34 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of the claim raises a question as to whether the claim is directed merely to an abstract idea that is not tied to a technological art, environment or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C 101.
3. Claims 1, 3-12, 26, and 30-32 appear to be directed to software system, per se, lacking the necessary hardware for any functionality to be realized.
4. Claims 13-24 and 33-34 appear to be directed to manipulation of an abstract idea (i.e., not concrete or tangible).
5. Claim 27, recites "A signal adapted to be transmitted..." is not tied to a machine (i.e., not concrete or tangible). Also, "... adapted to be transmitted" does not recite a

positive limitation as it only requires the ability perform a function, but not actually performing the function.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 25 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 25 recites “A computer-readable medium storing **the computer-executable component** of claim 1”. However, claim 1 does not contain any “computer executable component” as its limitation. The claim is unclear that the one ordinarily skilled in the art cannot recognize the encompassed claimed limitation.

9. Claim 27, lines 3 and 5, recites “... suitable target directories” is vague. The claim does not clearly set forth the metes and bounds of the limitation that the one ordinarily skilled in the art cannot recognize the encompassed claimed limitation.

Allowable Subject Matter

10. Claims 11 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

Prior art of record fails to teach a combination of elements determining a list scan penalty for reducing probabilities associated with scanning lists within a directory as recited in dependent claims 11 and 23.

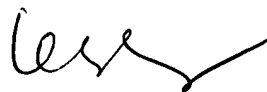

These features, together with the other limitations of the independent claims are novel and non-obvious over the prior art of record.
